Experience

Amazon

Aug 2025 – Present

Business Intelligence Engineer II

- Designed and deployed an **LTV-uplift based discount targeting system** (X-Learner + constrained optimization), improving campaign ROAS by +26% and reducing promo spend on unprofitable users by ~60%. Currently leading development of a **vendor-facing targeted discounting product for WFM**
- Launched an **LLM-based metadata quality scoring system** adopted as a core tech metric by leadership, establishing a **90%+ target** for all dataset owners across Amazon Grocery.
- Built an **LLM-orchestrated autonomous modeling workflow** that reduced model development time from **weeks to days** via automated feature engineering.
- Built **customer inference layer (feature store)** generating ML signals for personalization and targeting.
- Headed **A/B experiments** for cart recovery, driving a **3–5% lift in conversion** via optimized notification triggers.
- Mentored **2 Data Science interns** on end-to-end model validation and production-readiness standards.

Swiggy

May 2023 – Aug 2025

Manager Analytics

- Led design and deployment of a **spatio-temporal demand-supply optimization system** for Swiggy Bolt (10-minute food delivery), improving SLA adherence by +25.4 pp while reducing cost per delivery by 24%
- Led growth planning, improving *Menu-to-Order* conversion by 2% (+1.8K orders/day); spearheaded GTM for Swiggy Grow, capturing **10% GMV** and generating **15K iOPD**.
- Improved fraud rule precision from 75% → 90%, automating escalations and saving **500+ man-hours/month**; reduced false positives by 25% and strengthened identity-fraud defenses.
- Owned availability and unorderable search analytics, improving availability by 10%, reducing search failures by 0.8%, and driving **5K incremental orders/day**.

KMK Consulting Inc.

Sep 2021 – May 2023

Data Analyst

- Developed **Incentive Compensation (IC) model** for pharmaceutical clients, improving sales efficiency by 10%;
- Forecasted sales and HCP engagement to support quarterly planning and territory design for global brands.
- Optimized data pipelines and built **automation frameworks**, reducing latency by 20% and reporting time by 30%.

Lyxel and Flamingo

Apr 2021 – Sep 2021

Ecommerce Executive

- Managed Amazon & Flipkart PPC campaigns, delivering **14.5% MoM ROI growth** through targeted bidding and segmentation.

Technical Skills

- Languages:** Python, SQL, PySpark
- Data Platforms:** Snowflake, Redshift, AWS (S3, Lambda, Step Functions, SageMaker)
- Machine Learning:** Supervised Learning, Ensemble Models, Feature Engineering
- Experimentation:** A/B Testing, Hypothesis Testing, Causal Inference
- GenAI / LLM:** LLM Applications, Prompt Engineering, Workflow Orchestration
- Visualization:** Tableau, QuickSight

Achievements & Awards

- Secured **5th place globally** in Amazon's **2025 Hackathon** among **72 teams**.
- MAD (Made A Difference) Award** – Swiggy: Recognized for exceptional business impact & analytics-driven solution.
- Significant Development Award** – KMK Consulting: Honored for building automation frameworks that enhanced reporting efficiency.
- Values & Behavior Awards** – KMK Consulting Inc.
 - *Peak Performance*: For demonstrating outstanding ownership and results delivery.
 - *Personal Accountability*: For driving initiatives independently and exceeding project goals.
- GATE 2021 (CSE)**: Secured **All India Rank 5307** out of 1.2L+ candidates.

Education

UEM, Jaipur

Jul 2017– Jun 2021

B.Tech in Computer Science & Engineering
